

2026 Cabinet Glass

Upgrade cabinet doors with custom glass inserts to add light, texture, and visual interest to kitchens, bathrooms, or built-ins. We offer a wide selection of glass styles—from clear and frosted to patterned and decorative options—to complement any design.

Cabinet glass can be custom cut to fit existing doors, and our team is happy to help with measurements and style recommendations. Whether you're going for a modern, traditional, or transitional look, we have options to bring your vision to life.

Rain Glass

Rain glass features a vertical pattern and textured surface that create the illusion of rain trickling down a window.

Beyond the visual effect, the glass provides a high level of privacy and diffuses light.

Comes in thickness:

1/8", 3/16" & 1/4"

P62 Obscure Glass

Few patterned glass products offer the timeless appeal and versatility of Pattern 62—a classic solution. Pattern 62 offers an attractive appearance, obscurity, and light transmission capabilities.

Comes in thickness:

1/8", 3/16" & 1/4"

Frosted Glass

Frosted glass is a type of glass that has been treated to have an opaque, frosted appearance. The treatment process creates a diffuse surface that obscures visibility through the glass while still allowing light to pass through, resulting in a soft, diffused glow.

Comes in thickness:

1/8", 3/16" & 1/4"

Reeded Glass

Reeded glass is a type of patterned or textured glass characterized by so-called "ripples" that can vary in size, shape, and dimensions depending upon intended use.

Comes in thickness:

5/32" (1/2" Peaks)

Aquatex Glass

Aquatex glass is a pattern glass that has a slight ripple pattern as shown and is quite obscure.

Comes in thickness:

3/16" & 1/4"

Thin Reeded Glass

Thin Ribbed, also known as Thin Reeded or Corduroy, features 1/8"-wide ribs running parallel to the long dimension of the glass.

Comes in thickness:

1/8" only

Cast (patterned) shower glass is manufactured with inherent variations in texture, pattern alignment, and thickness. These natural characteristics are normal and not considered defects. Visibility, distortion, and pattern alignment may vary depending on lighting, viewing angle, and glass orientation.

2026 Tabletop Glass

Enhance your space with a custom glass tabletop, available in a variety of shapes, sizes, and finishes. We offer both tempered and non-tempered glass in thicknesses ranging from 1/4" to 1/2", with a selection of clear and colored glass options. Visit our showroom to explore our full range of color samples in person!

Our tabletops are made to fit your specific needs, with the ability to add holes, curved corners, and custom shapes for desks, dining tables, and more. Please note: beveling is not available on curved cuts.

Seedy Glass

Seedy glass, or seeded glass, includes the slight bubbles & wavy pattern found in early original flat glass.

Comes in thickness:
1/8" Only

Glue Chip Glass

Glue Chip Single-Sided is created by applying glue to one surface of the glass. As it dries and contracts, it forms a distinctive frosted pattern reminiscent of delicate leaf or vine designs.

Comes in thickness:
1/8" Only

Flemish Glass

Flemish is a clear, textured patterned glass that creates a gently distorted look reminiscent of hand-blown glass.

Comes in thickness:
5/32" only

Cottswold Glass

Cottswold features a deeply textured surface reminiscent of tree bark, offering a nature-inspired look with a high level of privacy.

Comes in thickness:
5/32" only

Artique Glass

Artique is a clear textured glass featuring subtle swirls and linear patterns that add visual interest.

Comes in thickness:
1/8" Only

Tinted Glass

Tinted glass is available in bronze, green, grey, and blue, offering a distinctive way to incorporate both glass and color into cabinetry.

Comes in thickness:
1/8" Only

Cast (patterned) shower glass is manufactured with inherent variations in texture, pattern alignment, and thickness. These natural characteristics are normal and not considered defects. Visibility, distortion, and pattern alignment may vary depending on lighting, viewing angle, and glass orientation.
